

Dinosaur Sticker Workbook

This book belongs to:

_____

How to use this section

- Read the dinosaur fact box.
- Circle the correct answers.
- Find the correct dinosaur sticker.
- Stick it in the box.
- Copy the keywords.
- Write one sentence.

Allosaurus

Allosaurus was a large meat-eating dinosaur. It walked on two strong back legs. It had sharp teeth with serrated edges, a bit like a knife. Allosaurus lived before Tyrannosaurus rex.

Circle the correct answers

What did Allosaurus eat?

plants / meat / fish / different foods

That means Allosaurus was a:

herbivore / carnivore / omnivore

Allosaurus had:

sharp teeth / armour / three horns / a long neck

Stick the dinosaur

Copy the keywords

sharp teeth _____

meat-eating _____

two legs _____

Complete this sentence

Allosaurus was interesting because _____.

Ankylosaurus

Ankylosaurus was a plant-eating dinosaur. It had bony armour covering its body. It walked on four legs. It had a heavy club at the end of its tail, which probably helped it defend itself.

Circle the correct answers

What did Ankylosaurus eat?

plants / meat / fish / different foods

That means Ankylosaurus was a:

herbivore / carnivore / omnivore

Ankylosaurus had:

feathers / armour / a sail / three horns

Stick the dinosaur

Copy the keywords

armour _____

tail club _____

defend _____

Write one sentence

Ankylosaurus was interesting because _____.

Apatosaurus

Apatosaurus was a huge plant-eating dinosaur. It was a sauropod, which means it had a long neck, a long tail, and a big body. It walked on four legs. Apatosaurus lived during the Late Jurassic Period.

Circle the correct answers

What did Apatosaurus eat?

plants / meat / fish / different foods

That means Apatosaurus was a:

herbivore / carnivore / omnivore

Apatosaurus had:

a long neck / sharp teeth / armour / three horns

Stick the dinosaur

Copy the keywords

sauropod _____

long neck _____

plants _____

Write one sentence

Apatosaurus was interesting because _____.

Diplodocus

Diplodocus was a long plant-eating dinosaur. It had a long neck and a very long tail. It walked on four legs. Diplodocus ate soft plants and leaves.

Circle the correct answers

What did Diplodocus eat?

plants / meat / fish / different foods

That means Diplodocus was a:

herbivore / carnivore / omnivore

Diplodocus had:

a long tail / three horns / armour / sharp teeth

Stick the dinosaur

Copy the keywords

long tail _____

herbivore _____

four legs _____

Write one sentence

Diplodocus was interesting because _____.

Oviraptor

Oviraptor was a small dinosaur with a beak and no teeth. Its name means “egg thief”. Oviraptor was omnivorous, which means it ate different kinds of food. It may have eaten hard fruits, eggs, fish, or shellfish.

Circle the correct answers

What did Oviraptor eat?

plants / meat / fish / different foods

That means Oviraptor was a:

herbivore / carnivore / omnivore

Oviraptor had:

a beak / armour / a long neck / three horns

Stick the dinosaur

Copy the keywords

beak _____

omnivore _____

different foods _____

Write one sentence

Oviraptor was interesting because _____.

Stegosaurus

Stegosaurus was a plant-eating dinosaur. It had large bony plates along its back. It also had spikes at the end of its tail. The spiked tail could help it defend itself.

Circle the correct answers

What did Stegosaurus eat?

plants / meat / fish / different foods

That means Stegosaurus was a:

herbivore / carnivore / omnivore

Stegosaurus had:

plates and spikes / feathers / three horns / sharp teeth

Stick the dinosaur

Copy the keywords

plates _____

spikes _____

tail _____

Write one sentence

Stegosaurus was interesting because _____.

Triceratops

Triceratops was a plant-eating dinosaur. Its name means “three-horned face”. It had three horns and a large frill on its head. It walked on four strong legs.

Circle the correct answers

What did Triceratops eat?

plants / meat / fish / different foods

That means Triceratops was a:

herbivore / carnivore / omnivore

Triceratops had:

three horns / feathers / a long neck / sharp teeth

Stick the dinosaur

Copy the keywords

three horns _____

frill _____

four legs _____

Write one sentence

Triceratops was interesting because _____.

Tyrannosaurus rex

Tyrannosaurus rex was a huge meat-eating dinosaur. It walked on two strong legs. It had a large skull, sharp teeth, and powerful jaws. Scientists know T. rex ate meat from scavenging and possibly hunting.

Circle the correct answers

What did Tyrannosaurus rex eat?

plants / meat / fish / different foods

That means Tyrannosaurus rex was a:

herbivore / carnivore / omnivore

Tyrannosaurus rex had:

powerful jaws / armour / a long neck / three horns

Stick the dinosaur

Copy the keywords

powerful jaws _____

scavenger _____

skull _____

Write one sentence

Tyrannosaurus rex was interesting because _____.

Answer key

Allosaurus: meat, carnivore, sharp teeth.
Ankylosaurus: plants, herbivore, armour.
Apatosaurus: plants, herbivore, long neck.
Brachiosaurus: plants, herbivore, long neck.
Diplodocus: plants, herbivore, long tail.
Oviraptor: different foods, omnivore, beak.
Stegosaurus: plants, herbivore, plates and spikes.
Triceratops: plants, herbivore, three horns.
Tyrannosaurus rex: meat, carnivore, powerful jaws.
